

SPT-3000 SD Card & USB Module Installation Guide

Check Contents

SD Card & USB Module ►

- 1 Check whether the power of PC POS system and peripherals are turned off.
- 2 Remove connectors for peripheral and DC power supply jack.

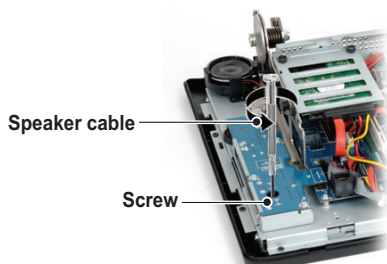

⚠ When DC power jack is removed, the neck of the power jack should be pulled and thus removed.

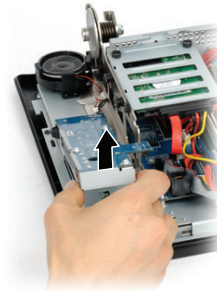

- 3 Remove screws, release lock-lever then finally remove system back cover, as shown in drawing.

- 4 Take off the speaker cable and screw from the bracket.

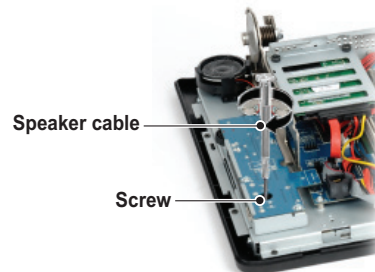

- 5 Remove original USB module by holding up the bracket.

- 6 Install new SD Card & USB module as shown in drawing.

- 7 Reconnect Speaker Cable and tighten the screw.

- 8 Assemble back cover cabinet, lock the lever and tighten the screw.
